

International Hardcoat

Your Concerns. Our Solutions.

High Performance Anodize Coatings And Finishing Services

IHC is a leading supplier of high-performance anodize coatings and finishing services to a broad range of automotive, aerospace and industrial markets. Since 1962, IHC has been meeting the most stringent performance standards in business environments that have been subjected to continual transformations. Just as these markets have undergone significant changes, IHC has changed with them by providing production dependability, technological expertise and total customer service.

Even though the anodize and hardcoat industry is extremely competitive, IHC maintains its professional edge by:

- Operating from a new, 104,000 square foot state-of-the-art facility...one of the *largest* single-source plants in the U.S.
- Running sophisticated, fully-automatic and semi-automatic process lines that can handle any job, from high volume to single pieces; from the largest to the tiniest in size.
- Maintaining an environmentally sophisticated, in-house waste treatment center.
- Certifying to ISO 9002 / QS 9000 standards. Independently audited twice each year.

Specialty Finishes Capabilities

HARDCOAT • ANODIZE
SULFURIC • CHROMIC
IRIDITE® • TEFLON™
COLORS • BRUSHING
BUFFING • SATIN FINISH
GRINDING • ASSEMBLY

Total Customer Satisfaction. Whatever It Takes.

IHC has built its success around the latest in systems, technology and training. From the equipment we use, to the procedures we follow and the educational methods we employ.

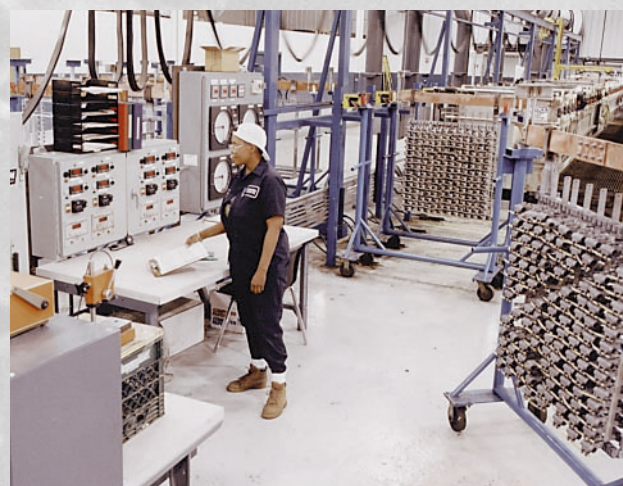

The systems that we have in place provide us with the flexibility to do anything...from custom processes to high volume commodity items. We also have the backup systems in place to support any equipment strain that might be encountered.

The IHC team has extensive experience in managing all aspects of coating. We also maintain documented procedures to ensure that training needs are identified and training is provided to all personnel performing activities affecting quality.

All of these efforts translate into a company that places its customers **FIRST**.

Total Value...The Best Solution.

As long as there is a need for solutions that improve product performance, IHC will relentlessly pursue ways to provide them.

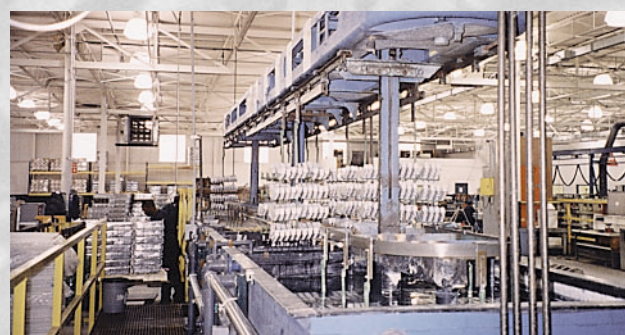

The best solution cannot be defined as the most expensive or the least expensive. It is the right solution delivered at the right time. In high quality, just-in-time business environments, it is the complete process that matters. A job performed correctly prevents downtime in manufacturing / assembly or at the end-product user level.

At IHC, we've built our reputation delivering "Total Value" solutions.
